

A documentary film that explores the causes and solutions of
the recent epidemic of autism in children

at the

Utopia Film Festival, Greenbelt MD

October 19 – 25, 2009

Autism: Made in the USA

(100 minutes)

Directed by Gary Null and Manette Loudon

What is autism and why is it on the rise? What environmental or genetic factors could be contributing to the epidemic increase in childhood autism and how are both orthodox and non-traditional therapies being explored?

*Sunday, October 25 at 12 noon
at the P&G Theatre*
